

THE GLEICHEN CALL

VOLUME 46 NO. 10

Published as second class mail.
Post Office Department, Ottawa.

GLEICHEN, ALBERTA, WEDNESDAY MAY 20, 1953

SUBSCRIPTION \$2.00 PER YEAR

HERE AND THERE

Wm. Sydeman of Cluny is at present confined to the Holy Cross hospital in Calgary due to illness.

Mr. and Mrs. R. M. Staback of Calgary spent the weekend holiday in town visiting relatives.

Mr. and Mrs. Bob Barrett and four boys of Kinross, B. C. are spending a few days in town visiting at the home of Mrs. Barrett's mother, Mrs. R. Woods.

Miss Herietta Riddell of Calgary spent the long weekend visiting her nieces Norman and Walter Riddell.

Empley Day was every quiet one in Gleichen. All business places were closed and the proprietors busied themselves with various jobs mostly of the garden variety.

Neighbor: "Are you still bothered by those relatives of yours who come every Sunday for dinner and never invite you to return?" Victim: "No, they finally took the hint." Neighbor: "What did you say to them?" Victim: "Nothing was said, but we served sponge cake every time they came."

The annual town tax sale was held last Saturday afternoon at 2 o'clock in the town office, with Secretary-Treasurer A. Horn calling for bids. The sale price was \$100.00. There was a sale for a horse and a bid. Since valuable property was offered for sale it was thought there would be much interest. This property was a Gleichen Plow Mill and the lot. The mill contains a lot of good lumber. Counting the secretary, Mr. Horn, there were eight people present. They were: Walter Pettit, Al Wilson, H. Colpa, John Boyd, Jack Lester, Ashu Seave and G. Evans.

Modern Calcium Cement
Mortars

Cutworms often cause severe damage to field and garden crops in the Prairie Provinces. Modern methods and new insecticides now make farmers with an acreage of an inexpensive, and a simple means of controlling their insect pests.

What are Cutworms? Cutworms are fleshy, soft-bodied, hairless caterpillars, which live at night and hide during the day. They are the larvae or the immature forms of certain moths or butterflies. Cutworms destroy young grain and garden plants by cutting completely through the stems at or below the soil surface. Generally, the most damage is done from late May to the end of June. There are many kinds of cutworms, but the most common and destructive form in the Prairie Provinces are the Red-backed cutworm and the Pale Western cutworm, both of which can be satisfactorily controlled by modern chemical methods.

New Chemicals. The principal new chemicals for cutworm control are Aldrin, Chlordane, Dieldrin and Toxaphene. These materials are sold in different concentrations in the form of emulsions (liquids), wettable powders, and ready-to-use granules. The important thing to remember is they can be conveniently applied to the surface of the soil with regular spraying or dusting equipment. The kind of chemical and the method of treatment will depend on the size of the area to be treated, kind of crop, and type of cutworm available. For more on new chemicals, the directions and precautions given by the manufacturer should be carefully read and followed.

Timely Hints. For best results, treatment for cutworms should be made as soon as, or even before, any plants appear above the ground. Watch for the first signs of damage, and then treat immediately. Naturally, the ideal program for cutworm control requires the use of both cultural and chemical measures. Consequently, cultural practices should be used wherever possible. Today, however, modern insecticides, properly applied, can be relied upon to give practical and effective control of cutworms.

Recent estimates show that the average Canadian telephone user, in the last 10 years, contributed \$25 in taxes to the Federal government.

Legion W.A. Meet

The regular meeting of the Canadian Legion Auxiliary was held in the Legion Hall last Thursday evening with 48 members present.

President Mrs. J. Bogate opened the meeting in the usual manner. The minutes of the last meeting and thank you letters were read.

Mrs. W. Schmidt, Sr., related the letter was favorably accepted. Miss Ethel Bates' application for membership was accepted.

Mrs. H. Bogate, Mrs. W. Schniell, Mrs. J. Bell and Mrs. Jones, were appointed as delegates to the Provincial Command Convention to be held in Edmonton June 14-17.

Mrs. Schmidt, Jr., gave a report on the Cancer Fund and informed the meeting she sent in \$522. The meeting then adjourned, much of dinner and a contest followed and social time was enjoyed.

This year this country is a great one for sudden changes in the weather. Yesterday was hot and Tuesday seemed to be as cold as it had been hot the day before.

Ted Krause arrived home from Keg River, Alberta, during the weekend. This place is some 750 miles north and west of Glenora.

Mr. Krause has a tractor and he was at work on the irrigation ditch running from Carleton Place to Glenora.

Mr. and Mrs. Forest House of Arrowwood, narrowly escaped serious injury and possibly death when their car ran into the last car of the freight train Saturday night at the crossing here while en route to Arrowwood. The car had stopped to let the train pass, also waiting to cross the freight cars on the opposite side of the track. Thinking the train had passed they started forward and came in contact with the caboose. The caboose caught the car near the front and sideways it badly damaging it. The occupants escaped injury.

A weekly paper started something when through a typographical error, it advertised a house containing a "living room, 18424". An English woman on a holiday in Canada wrote this to the paper. "The presentation of the 'living room' is an essential if Canadians, new and old, are to retain these marks of good breeding that are their right."

CARD OF THANKS
We wish to express thanks and appreciation for the acts of kindness, messages of sympathy and floral tributes received from neighbors and friends during our recent bereavement in the loss of a brother and uncle, the late Herbert, Patterson, Rupert, Anna, Ivy and Della.

Certain persons in the United States are asking the U.S.A. government to put an embargo on the importation of Canadian oats. Embargo, however, can be a two way street. The official records reveal that Canada during the calendar year of 1952 imported from the United States agricultural products to the value of \$77 million dollars. Included among these items—over 40%—were a number of products which we ordinarily produce in Canada such as apples, grains, meat products, prepared foods alcoholic beverages, animals, hides and skins, leather, meats, dairy products and so forth, and many other products that we import from other countries than the United States, such as fruit, nuts, vegetables, oil, sugar, alcoholic beverages, all cake, meat, fats, greases, cotton and products, flax, hemp and jute and so forth. So if the United States and Canada start embargoing each other's products, it would be quite simple for Canada to import less from the United States on many items, and either increase our production in Canada, which we could easily do, or buy more of certain products from other countries. The result is that any restriction of natural trade between countries makes us all poorer, causes discontent and invites retaliation.

Canada has 5,092 hotels.

Those Who Are Graduating Into Life

(Communicated)

Young people are faced with decisions of great importance to them and to the country. Those who graduate from our schools this year must decide at once what vocation they shall follow within a few years they must make up their minds about marrying and founding a family, and from now on they are charged with a certain responsibility for the development of Canada. All this requires that they get up a philosophy of life, if they have not already done so.

Graduates have been through chosen courses, matriculation, science, philosophy, arts, engineering, and so on. The next course is survival—not physical survival, because that is comparatively easy in this age—but survival as free men and women getting their satisfaction out of life.

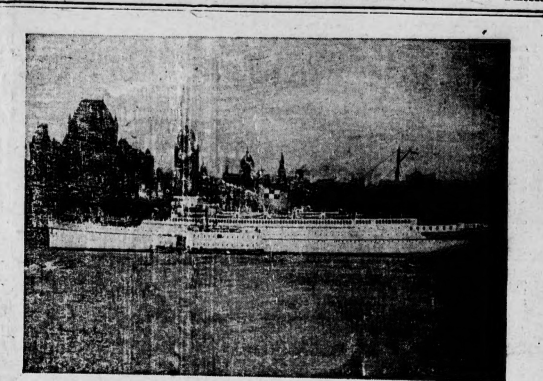

Graduation is only the end of a phase. The greater part of life lies ahead. Every year some 150,000 young Canadians search for openings in the 20,000 or more different vocations we have in Canada. The real problem facing them is raised by the fact that careers beckoned to by individuals have increased in number and fold. In the middle of the last century there were 300 occupations in the country; now there are 30,000, but of course not all are available in Canada. The number one problem, then, is to choose a vocation in which he can put more soul, and in which he can find more uplift than any other.

There are no greater tragedies than those brought about by merely drifting into jobs. Young people who all too often choose a life without lives then a purpose and provides them with satisfactory self-expression. It may be pointed out with reason that every person can work successfully in a number of occupations. It is equally true that for nearly every person there is some one vocation into which he can put more soul, and in which he can find more uplift than any other.

Those are inclined too often to choose on the best paying job of the moment, without asking themselves Will it give me satisfaction? As a consequence, they find themselves in dead-end jobs, disgruntled with life, and frustrated in their desire for self-expression. Men and women are needed today, and the demand will be equally great ten years from today, who are prepared to do a good job, at that preposterous cost of not just grow. Business executives know only too well how often they have had good positions go begging for trained men and women, simply because there are so many who are unwilling to qualify on their own initiative. Opportunities will come in spite of anything you can do, but if you are not ready for them they will pass on to someone else. There is an old saying to the effect that the small man wastes his time looking for big opportunities, while the great man uses his time taking advantage of the little ones as they come.

Besides all the obvious chances for earning a respectable place out of the years ahead, there are a thousand ventures not yet trodden, and for the adventurous Canadian Canada is still unexplored and undiscovered. In the world where progress is so little conditioned on "pull" and "influence", there is no country where a young man has a better chance to make his own way, according to his initiative and energy. Education is not thrown away on the man who shows exceptional ability, but is there for the taking by all.

Some leaders in the professions and industry made their careers in Canada by driving trucks, waiting in restaurants, and keeping books of account in their spare time. Psychologists have arrived at the conclusion that a young man who does some of this self help work is a better student and a better man than the one who has things made easy for him. But in Canada does not put an undue premium on higher education. The lad who leaves home to work has his opportunities, and after all, Burns, Shakespeare, Carlyle, Scott and Darwin came into the sunlight of fame through the parchments of Canada, and very few men at the top of Canadian industry and finance today have any except honorary university degrees. This is not to say that the education available to an aspiring young man is not the best education available in the world. It is to say that the education available to an aspiring young man is not the best education available in the world.

CANADIAN PACIFIC PHOTO

The Chateau Frontenac made an imposing background as the Empress of Australia, making her first west bound voyage under Canadian Pacific colors, passed Quebec City on her way

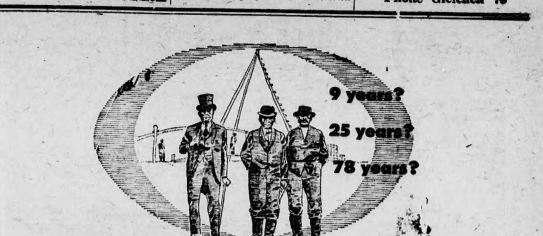

up the St. Lawrence River to Montreal. The 10,000-ton vessel was purchased by Canadian Pacific Steamships to replace the Empress of Canada, destroyed by fire at her Liverpool dock last January. She was

formerly the "De Grasse" of the French Line. This is the first of 10 round trip voyages between Liverpool and Montreal which this vessel will make during the present season of St. Lawrence navigation.

Very few people progress in this world if knowledge has had to be forced upon them, or if it is handed out on a silver platter with second helpings when they spill one serving. To people who succeed are invariably those who value the thirst for knowledge, go out and secure their knowledge in one way or another and then put it to work. There is a tendency for people to become too easily mechanized but have the machines so simplified in operation that they can be operated by anyone who employ unskilled laborers and teach them all they are required to know in a week or less.

It is obviously in the skilled occupations that education is of most value, for it provides background against which competent handling of situations may be erected. This is where vocational guidance has its most worthwhile sphere of activity. It is a major responsibility, these days, to guide young men and women so that they will make the best use of their natural skills and acquired knowledge in work suited to their interests and capacities.

This assistance cannot be given in a casual or routine way by teachers, clergymen and parents. It demands the service of people who can sit down

How long does an oil well last?

The average well goes dry in 20 to 30 years. To keep your car rolling and your home warm, a new well must be found to take its place. That's why the search for oil never ends; why Imperial, for instance, spent almost \$10 millions to find and develop new oil in western Canada last year.

Oil has become one of Canada's important industries. How many of these questions about it can you answer?

- Which of the following contain petroleum? ☐ Lignite ☐ Peat ☐ Bitumen ☐ Asphalt ☐ Kerosene ☐ Gasoline ☐ Fuel oil ☐ Lubricating oil ☐ Paraffin ☐ Wax ☐ Tar ☐ Pitch ☐ Asphaltum ☐ Gums ☐ Resins ☐ Natural Family Allowance in Detail

When you receive family allowances, and how do you apply? How much can you expect to receive? How does this affect your income tax? The Department of National Health and Welfare has answered a number of questions concerning family allowances in the following up-to-date summary of regulations.

Registration for Family Allowances

(a) To register a child for Family Allowance it is necessary to complete a Family Allowance Registration Form and send it to the Regional Director of Family Allowances.

(b) The registering of a child's birth with the Provincial authorities does not constitute registration for Family Allowances.

(c) Registration Forms may be obtained in any Post Office. White forms are for use in registering a child for the first time. Blue supplementary forms should be used in registering additional children in a family.

Payments of Family Allowances
(a) In the month following date of birth provided the completed Family Allowance Registration Form was received in the office of the Regional Director within 30 days after the birth of the child; or

(b) In the first month after the completed Family Allowance Registration Form was received in the office of the Regional Director.

Eligibility
Under the Family Allowance Act payments are made only to parents who maintain or has custody of a child. To be eligible for payments, the parent must be resident in Canada and in regular attendance at school as required by the laws of the Province in which the child resides.

Rates of Payment
Family Allowances are paid as follows:

Up to 6th birthday \$5.00 per month.
6th birthday to 10th birthday \$6.00 per month.
10th birthday to 13th birthday \$7.00 per month.
13th birthday to 18th birthday \$8.00 per month.

There are no deductions on account of the size of the family.

Changes in Rates

The rates change automatically on the first month following the month of the child's 6th, 10th, 13th birthday and payments cease with the said birthday.

REAL HELP FOR Your Itching Piles

ON NO COST
Hemorrhoids, an internal pile treatment, does not interrupt the itching, burning and swelling of your piles. Get a package of Hem-Hem-Do and use it. You will be pleased at how quickly your piles disappear. Hem-Hem-Do is the only medicine that relieves itching, burning, swelling, and pain after Hem-Hem-Do. Refund agreement by all drug stores.

Fashions

Week's Sew-Thrifty!

An excellent way to curl feathers is to use them in a very simple way. The week's Sew-Thrifty!

If the spring of the window shade is weak and the shade will not roll properly, rewind it without taking apart the shade up as far as possible and pass the lower end over the top of the roller from the inside several times, or until sufficiently tight.

If the oven doors have steel on them it can be cleaned by rubbing the steel weakly, while still warm with a soft cloth dipped in vinegar.

If there are ink stains on a rug saturate the spot with vinegar, then sprinkle salt over it. Take a large spoon and dip up all possible. Repeat several times and then rinse in cold water.

Sometimes a dull eye can be sharpened by soaking it for about 20 minutes in a dilute solution of sulphuric acid.

MUMMY'S TITILE DABBLING

Most of us enjoy having a very small child make his first attempts at talking but he should not be encouraged to use baby talk. By the age of four he should be able to pronounce ordinary words and sentences.

Any lingering babytalk should be gently but firmly eliminated. It helps the child to feel more secure in the family, when speaking to him, pronounce their words clearly and correctly. It is not a good idea to laugh at him or call the attention of others to his linguistic errors—he may develop a feeling of shyness in speaking to adults or he may use the mimesis as a means of attracting attention.

EASY FISHING

MAILLARDVILLE, B.C. — Henry Holmes, a parks board attendant, went to investigate reports of worried mothers that two feet of water in the basement of the Macklin Park Community Centre was a menace to children. He blasted away a corner of the abandoned building, and the water out. With the flood came a batch of speckled trout.

Southeastern France has manufactured Roquefort cheese for at least two centuries.

IT'S VERSATILE! It's the Wrap! Wrap it now for a corset, apron, lace for a wrap-around dress. Sewing and ironing are so easy—you use by the diagram how few parts and seams there are, easy, too, with that diagram how few parts!

Pattern 4689: Men's Sizes 12, 14, 16, 18, 20, 22. Size 16 takes 3 1/2 yards 30-inch.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be used) for this pattern. Write plainly name, address and city/number and send orders to:

Anne Adams Pattern Dept.,
Frederic Publishers Limited,
50 Front Street W., Toronto.

Funny and Otherwise

"Well, Willie, what did you learn at school today?"

"Well, Pa, I learned to say yes sir, no sir, yes ma'am and no ma'am."

"You did?"

"Yeah."

Boy friend—I hate to tell you this, Junior, but you're losing your school record, the party might see promised to my wife.

Junior—Huh, that's what the party was for.

Diner (suspiciously): "Why do you call this 'Enthusiasm' stew?"

Waiter: "Because the chef put everything he had into it."

"These new fashions are absolutely freakish," said Mr. Robinson.

"Every time I look at that new hat of yours it makes me laugh."

Junior—Huh, that's what the party was for.

"The manager heard that a 40-week clerk had a car and asked him how he could afford it, with four children."

"Oh, that's easy," said the clerk. "There are 500 of us employed at this factory. A minimum wage every week at a quarter a year."

"My boy friend kept me standing in the rain for an hour before he was prepared."

"What is do you say?"

"This is so sudden?"

A man who had been waiting patiently in the post office could not attract the attention of either of the girls behind the counter.

The evening clock," explaining one of the girls to her companion, "was in gorgeous lane brocade, with red and wide pagoda sleeves."

At this point the long-suffering clerk, who had been waiting for you if you could provide me with a neat, red stamp with a dinky perforated hem, the tout ensemble delicately turned on the reverse side of the envelope.

"What is do you say?"

"This is so sudden?"

Willie arrived home with two black eyes.

"Fighting again," said his mother. "Didn't I tell you that when you are angry you should count a hundred before you do anything?"

"Yes, I know," returned Willie. "But the other boy's mother told him only to count fifty."

A man took home a parrot as a present for his wife. "Oh, how lovely," she said. "But why hasn't got a string tied to each leg?"

"Full one and see," said his husband.

"Good afternoon, madam," the parrot said as she pulled the string attached to its left leg. "Pleased to meet you," it responded when she pulled the string on its right leg. "I wonder what would happen if I pulled both strings together?" she asked curiously.

"I should fall off my perch, your honor!" replied the parrot.

More Births, Deaths, Marriages in Canada

Continuing the trend of the last few months of 1952, births registered in Canada in January this year increased 13.1 per cent as compared with the corresponding month last year. There were increased registrations in all provinces except Prince Edward Island and New Brunswick.

Deaths in January were almost four per cent, higher than a year ago, with increases in Newfoundland, Quebec, Ontario, Manitoba and Saskatchewan, and declines in the other provinces.

Marriages increased 13 per cent, in number in January as compared with the same month last year. Increases were registered for all provinces except New Brunswick, Manitoba and British Columbia.

Births in Canada in January numbered 22,646 as compared with 20,000 a year ago; deaths, 11,500 compared with 11,088; and marriages, 5,722 compared with 5,054.

DRIVING TIP

On hills, a good car driver shifts to second gear when the speed drops to around 20 miles an hour.

Monarchs

KING HURSEIN I, of Jordan, and his cousin, King Khalid II, of Iraq, were both named of age May 2nd and took the Oath of the Monarchy at the other's respective coronation.

R.C.M.P. Musical Ride Has Lengthy History

(By Harold Morrison, CP Staff Writer)

OTTAWA.—The famed R.C.M.P. musical ride is to be performed at the Royal Tournament in London after the Coronation of the Queen, has a history almost as old as Canada. It was in the days of "gun-totin' cowboys and cattle rustlers" and "wild and lawless Indians" that the unique precision drill of men and horses was born. It was started by the Northwest Mounted Police, a tough, pioneering police force that helped to bring law and order to the unruly West.

Inspector William Dick of Lethbridge, Alta., who helped revive the musical ride after the Second World War, recalls an old diary which tells part of the story.

"There's an item in this diary which tells of an order issued in December, 1874, to a Sergeant-Major Seidler, instructing him to prepare two musical ride, one with lances and the other with swords," says Inspector Dick.

That order, seven years after Confederation, was issued at a remote Prairie settlement, "Pie of Bones Creek" now the thriving city of Regina.

Since then the fame of the "musical ride" has spread far and wide. Now the ride will be presented for the first time overseas before a reigning monarch. The Royal Tournament will be held June 19-21.

King George and Queen Elizabeth will sit in Regina during the 1939 Royal tour. A miniature band will lead Queen Elizabeth when she visits Canada in 1951 with the Duke of Edinburgh.

The spectacle of prancing black horses with colorful R.C.M.P. riders in the saddle performing intricate patterns of movement has survived through two world wars.

The old thing about that order at Pie of Bones Creek," says Inspector Dick. "It is that asked for a musical ride, performed with swords and lances, was issued. Swords are unusual. I've never heard of it since."

The R.C.M.P. still perform the charge—two rows of 16 horses abreast. The horses and riders, with lances pointed ahead and slightly down, will be led by a "parade" down at full gallop. It is a thrilling sight, with the horses' heads glancing and their hooves clattering and pounding the earth.

Sometimes red-and-white pennants fly from the lances, a link with the feudal gladiators who wrapped white cloths around their horses when they fought and sometimes killed.

At a show, the 32 horses like all kinds of tunes including rhumbas, fox trots and waltzes. They trot, gallop and even do a "side-stop" when all with a fine sense of timing.

At a preview of the ride here as horses and riders (taken at R.C.M.P. barracks at Rockville) the animals went around the arena, heads held high, tails and manes flowing. Not a horse was out of step.

REGINA.—During the first quarter of 1953 the number of traffic accidents in Saskatchewan increased by 49 per cent, and the amount of damage by 62 per cent, despite the fact that total mileage was up only 20 per cent, according to Saskatchewan Highway traffic board figures.

In March this year six people were killed, three times as many as the toll last March. Number of fatalities for the first three months, however, was only one more than in the corresponding quarter of 1952. A total of 444 people were injured in the first quarter last year.

The estimate that property damage during the period cost \$754,000, and by June, if it follows the pattern set last year, it is likely to be well over a million dollars.

Greatest single causes of accidents are careless driving and failure to have right of way.

The traffic boards figures show that the worst hours of the week for driving come on Monday, Thursday and Saturday, with the hours from five to eight on Saturday afternoon being the worst time of the week for traffic accidents.

Don't Neglect Slipping FALSE TEETH

Do false teeth drop, slip or wobble when you talk, eat, laugh or exercise? If so, you may be suffering from loose hold-downs. FASTEETH, an alkaline cream, keeps false teeth snug firmly set. Gives excellent relief of soreness and added comfort. No gummy, gooey paste. No sticky, sticky residue. No worry at all drug store.

—By Chuck Thurston

Ringworm Disease To Be Investigated By Scientists

OTTAWA.—A disease common in rural areas, suppurative ringworm contracted from cattle, is to be investigated by scientists at the University of Manitoba, Winnipeg, with the financial support of a Federal grant. Hon. Paul Martin, minister of National Health and Welfare, announced the grant.

The study will be carried out by Dr. J. G. Witt, chairman of the department of bacteriology, and Dr. R. Bitt, lecturer in dermatology, assisted by Miss E. Hirst, all from the University of Manitoba's medical college.

They hope to discover new facts about the origin of this disease and thus to improve treatment procedures and perhaps to devise means of controlling its spread, the federal health and cultural studies to determine the fungi causing the disease and studies of barn dust and soil from the patient's farm to see if the reservoir of infection can be discovered and control measures instituted. Studies will be undertaken to ascertain whether or not treatment with the new antibiotics is effective.

The study, which will last for from one to two years, will be carried out at the Winnipeg General Hospital, the Children's Hospital and with the co-operation of general practitioners in rural Manitoba. The federal grant to cover cost of the research in the current year is \$1,000.00.

OUR COMPLETE SHORT STORY

MADAM PRESIDENT

By RUTH K. KENT

Alice Duncan's soft forehead creased. "But Mrs. Weatherly has been president of the Knitting and Literary Club ever since it was organized. I don't see how we can get her to resign after giving over a quarter of a century to this club."

Martha Adams' broad mouth smiled. "Don't worry, Alice. We'll make it look like a favor to her. It's time she got out and let us young women run the club."

"Sure," Sally Cooper was knitting a sweater for her first baby. "Let's put some pep in these once-a-week sessions."

Herbert Mason was older than the other members. "Pop isn't what we want, Sally," said she gently. "But we need to modernize. The older women have dropped out and organized a sewing circle of their own. Mrs. Weatherly probably only stays on to be loyal."

Alice wondered at that. True enough, Mrs. Weatherly was the only aged member, and her loyalty was unflinching. But Alice felt a sudden ache at the thought of the meetings without Mrs. Weatherly's guidance. "She's done so many good things for the club," she reminded the girls.

"Alice," Sally cut in, "what this club needs is some pep and a few modern things... charm and make-up..."

Harriet smiled. "We need modern speakers. But on the arts, poetry, flower arrangements, and such things."

"But can't we have those and Mrs. Weatherly, too?" a new member asked.

Alice squirmed. She did think modern speakers would be interesting. But she wanted no part in anything that would hurt Mrs. Weatherly's feelings.

Martha jumped up. "We'll send a committee to sympathize with her because she lost her husband. We'll tell her that she needs a rest. She has a cousin in the city and could go there for a visit... or to stay."

Harriet supplied, "And she hasn't had time with her husband to do so many of the things she enjoys."

"We'll give her a fountain pen," Sally supplied. "We'll make her write some more poetry. Everybody

tries to write poetry."

"My mother liked her poetry," Alice defended.

"We'll give a luncheon next week and present her with the pen," Martha enthused. "And we'll give her a eulogy. Alice was a good friend of your mother's. Dig up some nice things to say about her."

Alice frowned. "She didn't want to be on this. Still, if Mrs. Weatherly let them persuade her to resign, maybe the club was a burden to her after all. It won't be hard to find things to say." Alice said.

It wasn't either. Alice came to the luncheon with a handful of papers. "She's done so many good things," she told Martha. "She organized the school lunch fund, the letters to homesick kids. She gave the flowers that decorated the church for years, and there has never been a funeral in this town without some of her kindness."

"Martha told her to leave," Alice said. "She was awfully agreeable about resigning. We had a classy speech today but she backed out," Martha frowned. "The committee said someone is bringing her back."

"Alice," Sally said, "I hope Weatherly isn't bringing someone."

"She's brought," if they thought she was going to let Mrs. Weatherly leave without a few kind words.

"We're surprised. They are the girls going to be surprised anyway," Alice had made up her mind to defy them and ask Mrs. Weatherly to resign.

"They hate her, and she was almost afraid to do it. But she had to. She needed this club as an outlet for the hard work at home."

"They hate her, and she was almost afraid to do it. But she had to. She needed this club as an outlet for the hard work at home."

"They hate her, and she was almost afraid to do it. But she had to. She needed this club as an outlet for the hard work at home."

A REAL-LIFE DRAMA was being enacted on the Pitt River Bridge, north of Redding, Calif., when a San Anselmo, Calif., housewife obtained this dramatic rescue picture of truck driver, P. M. Overby, of Portland, Ore., being drawn from sure death on the end of a rope after the cab of his truck went over the side of the bridge and tangled there just long enough for the rescue to be carried out. Shortly after his picture was taken the huge trailer-truck caught fire and the cab fell to the lower span.

Music Should Be A "Must" In Schools

TORONTO.—Dr. Edward Johnson said music should be taught in Canadian schools on a "must" basis, the same as arithmetic.

Dr. Johnson, Quebec-born former managing director of the Metropolitan Opera of New York and now chairman of the Royal Conservatory of Music here, told a Rotary Club meeting that, by doing so, the musical taste of the whole country could be raised and "perhaps make our country the greatest musical centre in the world."

"We should develop the same enthusiasm for opera that we now have for hockey," he said.

He said that he had seen a number of children who were very good at hockey but who were not very good at music.

He said that he had seen a number of children who were very good at hockey but who were not very good at music.

Scientists Find Mite Which Spreads Virus Of Wheat Disease

LETHBRIDGE.—Another triumph has been scored by Canada's agricultural scientists with the discovery that streak mosaic, a virus wheat disease, is spread by a specific type of mite. Dr. John T. Strydom, plant pathologist at the Dominion science service laboratories here, identified the insect as the virus carrier while working last year in southern Alberta wheat fields. It has seldom been found in Western Canada.

The mite was taken from the crissipifolia family of four-legged mites. Most have eight legs. This was further broken down to the aceris genus and the tulipae species, so called because of some dubious relationship to tulip diseases.

The mite was taken from the carrier after tests in the laboratory here. The experiments seemed to show the mite can transmit a disease which causes leaf discoloration similar to streak mosaic but which actually isn't the same thing.

Dr. Strydom says the virus can be disastrous if most of a farmer's crop is in winter wheat. He recommends winter wheat be planted in mid-September and spring wheat soon after. He says the virus can be infected but not seriously. Rye is exceptionally resistant.

The laboratory now is working to develop grain types hardy enough to resist the mite and its virus.

It may be no need for this if planting time changes prove successful.

Continued from page one)
THOSE WHO ARE GRADUATING
experience, a breadth of understand-
ing, and a patience which will with-

er build confidence, reach the truth,
and help in setting up objectives.
One way to attract favorable notice
is by taking extra care so as to earn
a reputation for dependability. This
means looking beyond the day's work
and accepting responsibility. De-
pendability is not achieved by listen-

ing to lectures, but by thought, hard
work and self denial.

Numerous studies seem to show that
only 5 to 25 per cent of dismissals are
due to incompetence, slowness, spoila-
ge of materials, and physical un-
adaptability. Causes of most other
dismissals are given as: personal de-
fects, lack of job wisdom, and emo-
tional immaturity. Included are
such things as: insubordination,
laziness, trouble making and drink-
ing.

Dependability means being able to
trust your own conclusions arrived
at after your best consideration. A
man who wants advice before he does
anything important can never be de-
pendable in business. Dependability
demands that if you happen to
be wrong you admit it quickly and
emphatically. There is no more ef-
fective way of demonstrating depen-
dability than to speak out when you
know you are right, and to admit un-
hesitatingly when you are wrong.

These things enter into personality,
which is the sum total of the effect
we have on other people. The enter-
prising, energetic, dependable man
has an authentic dignity. The out-
ward appearance is only the manifesta-
tion of something inside. This some-
thing usually inclines a man to
take the gentle, the favorable, the
indulgent view of his companion's
failings, and to be courteous even
under provocation.

Personality may be modified by
temperament. Everyone is entitled to
a temperament, provided it doesn't
get in the way of his advancement.
Temperament is merely a natural
disposition which determines how we
will feel and act at various times and
under various circumstances. The
author, artist, poet, sculptor and actor
are excused because people sub-
scribe to the dictum of the German
philosopher that "One must have
chaos in one to give birth to a dan-
cing star," but ordinary people cannot
get away with too many tempermen-
tal tantrums.

(To be continued.)

The disastrous fire that swept Ot-
tawa in 1900 rendered more than
50,000 homeless, destroyed more than
\$10,000,000 worth of property.

Town & District

There were quite a few people
from various parts of the province in
town over the long weekend holiday
visiting friends or relatives.

Mr. T. B. Northfield, Optometrist,
will be at the Queen's Hotel in Glei-
chen on Friday afternoon, May 29, for
the purpose of examining eyes, etc.
Calgary office 514 Greyhound Build-
ing.

Mr. and Mrs. David McLean of
Calgary are at present out on their
farm north of town. They are busy
getting the place ready for this year's
work. As soon as their work is done
they will return to the city.

Seeding is one of the main oc-
cupations on the farm these days.
From early morning until late at
night the work goes on. If one drives
a car up on a hill at night time
lights all over the country show that
the farmer is busy in the fields.

Alex Murray has brought his young
son home from the hospital where he
had been recovering from severe in-
jury. A Bennett wagon loaded with
manure had run over the child's ab-
domen and he was injured severely
internally. No one saw the accident
happen and it was difficult to believe
the boy was on the road.

The Empire Day sports that were
to have been held last Monday were
postponed until next month. The
reason for the postponement was the
committee in charge of the sports
felt that the farmers were too busy
seeding and very few if any could
afford the day off. A drive over the
country side Monday showed that the
committee had the right idea, since
there was field activity on almost
every farm.

John Faa, a resident at Eventide
Home for the past two years died
Saturday evening at the age of 77
years. He was born in Norway and
had lived in Alberta for the past 10
years. He came to Gleichen from

Camrose where he had farmed for
many years. The remains were sent
to Camrose Tuesday afternoon for
burial. The funeral will take place
today.

FORD

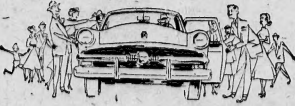

CRESTLINE VICTORIA

The best way to measure Ford's dollar-for-dollar value is to
compare it feature-for-feature with other cars that cost as much or
more. We think you'll be surprised at what you'll find. For example,
you'll discover that Ford's Strato-Star 110-Hp. V-8 engine is the kind
of engine you've always associated with the most expensive cars...
that it delivers the kind of power and smoothness you never hoped to
find in a car that's priced as low as Ford. When you try out Ford's
relaxing "Wonder Ride" you'll sense that "big car" feeling that's so
satisfying to a driver. When you take into account Ford's choice of Fordomatic,
Overdrive or Synchro-Silent transmission—and realize how many attractive
extra features Ford includes... well, then you'll understand why more and more
motorists are making Ford their new first choice!

PIANOS

The Alberta Piano Co., Ltd., Calgary, Alta., offers amazing
values in new and refinished pianos, all carrying our service
guarantee. Prices to suit every pocket-book from \$200.00
upwards, including such makes as Kurtzman, Gulbransen,
Mason & Rice, etc. Our demonstration vans will visit points
in Alberta by request. A fine stock of new pianos is always
available in Blond, Walnut, or Mahogany.
